

INLAND NAVIGATION AND CANALIZATION

Margaret S. Petersen, Emerita Associate Professor
Department of Civil Engineering and Engineering Mechanics
The University of Arizona, Tucson, Arizona, U.S.A.

TABLE OF CONTENTS

	<u>Page</u>
1. INTRODUCTION	1-1
2. PLANNING FOR CANALIZATION	2-1
3. NAVIGATION LOCKS AND DAMS	3-1
4. PHYSICAL FACTORS AFFECTING SITING OF NAVIGATION STRUCTURES	4-1
4.1 - Terrain	
4.2 - Geology and Soils	4-1
4.3 - Streamflow and River Stage	4-1
4.4 - Ground Water	4-2
4.5 - Climate	4-2
4.6 - Sediment	4-2
4.7 - Environmental Resources	4-3
4.8 - Infrastructure and Commercial Resources	4-3
5. INLAND NAVIGATION CRITERIA	5-1
5.1 - Minimum Dependable Depth.	5-1
5.2 - Adequate Channel Width	5-2
5.3 - Freedom from Hazardous Currents	5-3
5.4 - Minimizing Lock Transit Time	5-3
5.5 - Terminal Facilities	5-4
6. OTHER DESIGN REQUIREMENTS	6-1
6.1 - Flood Stages	6-1
6.2 - Drainage	6-1
6.3 - Water Supply Intakes	6-1
6.4 - Sewage Contamination	6-2
6.5 - Vector Control	6-2
6.6 - Fish and Wildlife	6-2
6.7 - Recreation	6-3
6.8 - Hydropower	6-3

7.	NAVIGATION DAMS	7-1
7.1	- Navigable Movable Dams	7-1
7.2	- Spillways	7-2
7.3	- Spillway Gates	7-3
7.4	- Spillway Piers	7-5
7.5	- Ice	7-5
8.	NAVIGATION LOCKS	8-1
8.1	- General Considerations	8-1
	- Lock Location	8-1
	- Cofferdams for Construction	8-2
	- Access to Construction Site	8-3
	- Availability of Construction Materials	8-3
8.2	- Lock Design Criteria	8-3
	- Lock Size and Number of Locks	8-3
	- Lock Lift	8-4
8.3	- Lock Types	8-4
8.4	- Lock Depth and Lock Floor	8-5
8.5	- Lock Gates and Sills	8-6
	- Miter Gates	8-8
	- Tainter Gates	8-8
	- Sector Gates	8-8
	- Lift Gates	8-8
	- Emergency Closure Sills	8-8
8.6	- Lock Walls	8-9
	- Lock Chamber Walls	8-10
	- Upper and Lower Gate-Bay Walls	8-10
	- Culvert-Intake Walls	8-10
	- Culvert-Discharge Walls	8-11
	- Approach (Guard and Guide) Walls	8-11
8.7	- Lock Filling and Emptying Systems	8-12
	- Hawser Stresses	8-13
	- Filling and Emptying Over, Between, or Around Lock Gates	8-14
	- Filling and Emptying by Valves in Gates or through Short Culverts	8-14
	- Filling and Emptying through Wall Culverts and Ports or Laterals	8-15
	- Early conventional wall culvert and port systems	8-15
	- Modern systems	8-15
	- Intake manifolds	8-16
	- Control valves	8-18
	- Wall culverts	8-19
	- Wall-port systems	8-19
	- TVA multiport system	8-20

	-	Lock chamber lateral diffusers	8-20
	-	Lock emptying systems	8-21
	-	Bottom Longitudinal Filling and Emptying Systems	8-22
	-	Culvert area ratios	8-23
	-	Longitudinal floor distribution culverts	8-23
	-	Port manifolds	8-23
	-	Ports	8-23
	-	Operation	8-24
8.8	-	Emergency Closure Facilities for Locks	8-24
9.		NAVIGATION CONDITIONS IN LOCK APPROACHES		9-1
9.1	-	Dardanelle Lock and Dam, Arkansas River	9-2
9.2	-	Lock and Dam 2, Red River	9-2
9.3	-	Robert S. Kerr Lock and Dam, Arkansas River	9-3
9.4	-	Olmsted Lock and Dam, Ohio River	9-4
9.5	-	Canal Surge and Tow Squat	9-4
	-	Temporary Lock 52, Ohio River	9-6
	-	Bay Springs Lock and Dam	9-6
	-	Lock and Dam 17, Verdigris River (Choteau Lock and Dam, Arkansas River Navigation Project).	9-8
	-	Shoaling	9-9
10.		DREDGING		10-1
10.1	-	Arkansas River Dredging	10-2
10.2	-	Mississippi River Dredging	10-5
10.3	-	Missouri River Dredging	10-6
10.4	-	Red River Dredging	10-6
10.5	-	Effect of Hinged Pool Operation on Maintenance Dredging	10-7
10.6	-	Dredging Equipment	10-7
	-	Mechanical Dredges	10-7
	-	Hydraulic Suction Dredges	10-8
	-	Hopper dredges	10-8
	-	Sidecasting dredges	10-8
	-	Hydraulic pipeline dredges	10-8
10.7	-	Dredged Material Disposal	10-9
11.		INNOVATIVE LOCK DESIGN		11-1
11.1	-	Need for Rehabilitation or Replacement of Navigation Structures	11-1
11.2	-	Increasing Lock Capacity	11-2
11.3	-	Need for Innovation in Lock Design	11-3
11.4	-	Innovative Lock Design Program	11-3
	-	Winfield Locks and Dam, Kanawha River	11-4
	-	Modeling Program	11-4

-	Marmet Lock and Dam, Kanawha River	11-4
APPENDIX A	REFERENCES	A-1
APPENDIX B	RED RIVER WATERWAY	B.1
B.1	- Project Description	B-1
B.2	- Sediment	B-2
B.3	- Hinged Pool Operation	B-3
B.4	- Reaeration	B-4
B.5	- Optimization of Spillway Design	B-4
Attachment B.1	- Typical Spillway Optimization Study, Red River, Louisiana, Appendix D, CE EM 1110-2-1605, 12 May 1987)	B-10
